

As we appreciate fine recordings, this year in addition to featuring recordings from Foné and Snip, we will be featuring R.M. a company whose re-mastering technology makes CDs sound much more like vinyl. Guillaume Chalaron, the founder of R.M., will be giving comparative demonstrations of his re-mastered works. Can his re-mastered CDs sound as good as vinyl? Come and hear for yourselves.

Please visit us, our room is Atrium 4.2 Room E206, and experience the beauty of fine audio reproduction. As we design our speakers to perform well on all genres of music, and have yet to experience music that we do not like, we are happy to play music brought by visitors. We actively encourage visitors to bring along their favourite CDs or high resolution music files so that you can experience what JoSound products sound like with music that you love.

JUST THE MUSIC

JoSound returns to the High End 2016 from May 5th to 8th (Munich M.O.C.) with its latest stereo loudspeakers Horus, a dual horn design that made its world debut at last year's event to much acclaim.

ATRIUM 4.2 ■ ROOM E206

SYSTEM CONFIGURATION

Our demonstration system this year will comprise the following devices :

TRANQUIL PC MEDIA ONE

Multimedia Player, genuine HiFi mediacenter. One piece aluminum cabinet, enabling fan-less cooling, which makes it completely silent.

AMR CD-777 & DP-777

CD player with ECC88 tube output stage and 32-bit digital processor. RCA / XLR analog outputs.

TRANSROTOR ZET 1

Turntable with acrylic chassis. 9 kg solid aluminum plate. TR-800S tonearm. Merlo MC cartridge. Highly customizable, whether a second motor and a second arm, a stabilized power supply, a TMD bearing... Available in black or white.

AURORASOUND VIDA

RIAA phono stage with separate power supply. For MM and MC cartridges. 2 processors / channel. Rodium RCA connectors.

O2A QUINTESSENCE SUBLIME

Cables at very high speed of spread. Copper silver treaty or silver. Triple shielded double aluminum braid. Double PTFE insulation. Quintuple mechanical isolation / HF radio / electromagnetic / thermal / UV. Satin black PE sheath high temperature resistant finish.

PS AUDIO POWER PLANT P10

Power current generator delivers an alternating current of very high quality. 70A / 1800W capacity. 9 SCHUKO plugs.

JO SOUND HORUS

Wide range loudspeaker. 40mm thick bamboo cabinet, compatible with most wide range 8 inches drivers. Unique dual ported loading system that behaves like a horn, transmission line and bass reflex all at the same time. Equipped with 8 inches AER drivers with a 99dB sensitivity.

JO SOUND STANDS

Completely modular bamboo stands mounted with stainless steel and Delrin inserts feet and pillars from Track Audio.

ARTE FORMA AUDIO

DUE VOLTE

Two 805 tube mono-block power amplifiers in asymmetric mode. Wood frame. 35W / Class A. 4A peak output current. Frequency response 10 Hz - 35 kHz. THD <0.03%.

BESPOKE AUDIO

Passive preamplifier. 6 stereo inputs. 2 stereo outputs. Output level, adjustable by 46 steps, controllable by remote control. Different possible finishes.
