

PLATINUM M

quadral's new PLATINUM M family displays unique harmony in exquisite speaker technology. A live experience is the ideal it competes with. With every pitch and any instrumentation, it fills the room with lifelike sound. Low-vibration housings, enlarged drive magnets, and improved cones made of aluminium bring life to turbulent bass runs and flawless, exhilarating middle tones. And above all, quadral's new RiCom V ring transducer shines, with its ultra-fine resolution. Reliving the

atmosphere of a live concert requires perfected technology: PLATINUM M. Whether with analogue hi-fi stereo or digital surround sound, your home becomes a VIP box. PLATINUM M's sound transports you right to the concert or into the thick of the film action.

White front frames are available as an option.

PLATINUM M

FACTS PLATINUM M RANGE

- High-end RiCom V ring transducer technology for superlative high-range reproduction. Ultra-fast membrane with broad emission characteristics. Including wave guide technology
- Flow-optimized fibre reinforced ABS basket
- Light, stiff aluminium/magnesium membranes in combination with strong drive magnets ensure the highest pulse fidelity
- Unique pressure-chamber system for almost unbelievably controlled bass volume
- Elaborate crossover with high quality film capacitors and air-core coils
- Base plate with spikes for acoustic decoupling from floor
- Center speaker with excellent speech intelligibility and runtime correction
- Gold-plated bi-wiring terminals with cable bridges
- Piano finish of black and white high-gloss varnish, polished several times
- In surround mode, the PLATINUM M glistens with QUBE 10 and QUBE 12
- Covers are held secure by magnets — with the accent on design standards
