## History

**2015** quadral presents its new power amp, M10 at Munich High End show. This amplifier provides more than 1,000 Watts power and is 100% Made in Germany.

launched a power amp / pre-amp combination in order to drive the big AURUM models TITAN, VULKAN and MONTAN. Both models are handmade in Germany and follow the roots of the smaller models A5/C5 and A3/C3.

**P8

# PLATINUM M

quadral's new PLATINUM M family displays unique harmony in exquisite speaker technology. A live experience is the ideal it competes with. With every pitch and any instrumentation, it fills the room with lifelike sound. Low-vibration housings, enlarged drive magnets, and improved cones made of aluminum bring life to turbulent bass runs and flawless, exhilarating middle tones. And above all, quadral's new RiCom V ring transducer shines, with its ultra-fine resolution. Reliving the

atmosphere of a live concert requires perfected technology: PLATINUM M. Whether with analogue hi-fi stereo or digital surround sound, your home becomes a VIP box. PLATINUM M's sound transports you right to the concert or into the thick of the film action.

White front frames are available as an option.

An uplifting sound experience right at home. Ambitious shapes accompany this pinnacle of cinematic sound. The success of this quadral series lies in its design, its redefinition of the world of surround sound — blazing the trail with beauty, a slender figure and lightning-fast membranes. These speakers reproduce music and speech with the most exacting precision, from tender lyrics to the thundering echoes.

CHROMIUM handles demanding stereo with natural supremacy. With digital technologies like Dolby Digital®, Dolby True HD®, dts® and dts HD®, its sound potential comes to full flower. CHROMIUM even brings the nuances of modern audio DVDs, SACDs and Blu-Ray Discs™ perfectly to the fore.

CHROMIUM, a masterpiece for two worlds: sight and sound.

## RHODIUM

Petite, linéaire, puriste – the new RHODIUM Series surprises and wins over eyes and ears. Despite the compact dimensions, the loudspeakers of this series offer a voluminous soundstage through the combination of a titanium coated diaphragm with a forefront bass reflex port. The 25 mm aluminium dome provides a first class sound in high frequency ranges. The result: an all-round speaker that is perfectly suited for both stereo and surround setup. Furthermore, the shapely RHODIUM cabinet can be easily adapted and considered for every kind of living environment. The silk gloss finish – available in black or white

– is again a testimony to our technical mastery in the build process. A magnetic front panel lies on the entire forefront of the loudspeakers like a thin scarf. Chromed spikes, adjustable in height complete the noble appearance and improve the sound experience with the acoustic decoupling.

THE RHODIUM Series includes two column loudspeakers, one shelf speaker and one centre. All models are made with a high-quality metal terminal connections.

### Facts ASCENT LE

- aluminium tweeter with sophisticated inner damping and special large corrugation for precise high-range reproduction up to 46 kHz
- especially strong drive magnets for high pulse fidelity, woofer with large membrane surfaces for live-sounding bass response
- titanium coated polypropylene membrane for even more precise, detailed sound reproduction – less resonances
- extra strong, low-resonance housing
- rounded cabinets with less resonances in white and black varnish

### Facts ARGENTUM

- SACD tweeter - extreme light silk dome plays up to 35 kHz
- aluminium voice-coil-carrier for high power handling
- 22mm baffle, high-gloss varnish

## QUBE

Perfect your listening enjoyment. The rich strokes of a double bass, the wrath full rumble of a storm and the crack of thunder – often it's not until you use a subwoofer that these become a true sonic experience. Getting those long low-frequency sound waves oscillating optimally calls for targeted development of speaker diaphragms, cabinets, electronics and, of

course, their optimum interaction. Subwoofers take the strain off your other speakers, enabling them to concentrate fully on the high to low-midrange. Active subwoofers offer additional support via an integrated end stage.

# breeze<sup>one</sup>

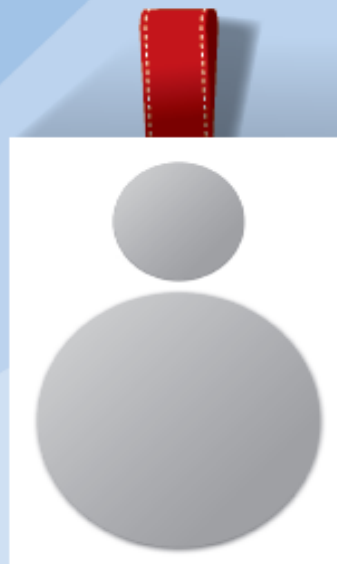

Traditional hand-crafting meets modernity in design and the latest technology: breeze redefines portable, mobile sound.

The impressive wooden cabinet houses a high-tech chassis, a high power amplifier and innovative wireless technology.

**breeze one is, thanks to a Bluetooth® interface and a powerful battery, the perfect sound source for an open air party at the lake, a picnic or a comfortable evening on the terrace.**

At home these active speakers shine as a result of a meticulously sanded varnish finish, which integrate perfectly with the latest multi-room technology. As a result, several loudspeakers in different rooms can be connected via our app. Alternatively, different types of music from various sources can be played in various rooms via a tablet or smart phone.

Your options are unlimited – whilst operation is a breeze!

## SPECIFICATIONS

Performance	25 Watt
Frequency response	60–25.000 Hz
Battery runtime	> 20 h <sup>1</sup>
Dimensions	W 15,5 x H 22 x D 12 cm <sup>2</sup>

<sup>1</sup> at half the rated power

<sup>2</sup> plus foldable handle

**Son très agréable et d'excellente spatialité**

- + Stabilité étonnante des niveaux
