

RONDO

The quadral RONDO is an active desktop speaker that meets the highest demands regarding design, functionality and sound quality. The up-scale appearance of the RONDO's compact, wooden housing comes from its black or white high-gloss finish and the controls that are made from solid aluminium.

The outstanding RiCom V tweeter and the titanium-dampened 4.5 inch woofer are both driven by a powerful 100 W power amplifier and this combination guarantees astounding and exciting acoustic reproduction. Tablets, PCs and smart

phones can be linked to the RONDO via the wireless Bluetooth network. A USB input with a soundcard function enables a direct connection to be established between the speaker and a laptop or a PC, so that music with fascinating sound quality can be played from databases. A subwoofer can also be interfaced to the RONDO using a separate output that has its own automatic high-pass circuit.

The quadral RONDO is the active desktop speaker with an "extra touch".

RONDO	RONDO aktiv
Type:	2-way active loudspeaker, bass reflex
Power (W):	2 x 50/70
Harmonic distortion. (Klirr):	< 1%
